

Web Development Instructor

Do you want to live a thrilling adventure in an international startup?

You are a software developer?

You like to share your knowledge and passion about coding?

Wild Code School is a European network of campuses offering short training programs to learn in-demand digital skills through a blended learning approach. We train digital professionals able to adapt to changing work situations and environment. We already trained more than 1,000 web developers since our creation in 2014 in France.

We are seeking a Web Development Instructor to join our growing team in Madrid. The Instructor will be on campus every day alongside with the Campus Manager and the students.

The Essence of the Job

- Prepare workshops, courses and dojos for the training
- Guide students through development of client-projects and ensure quality of the projects
- Enrich Wild Code School teaching material and content (quest, videos, etc.)
- Inspire students on technical skills and soft skills, share your passion for coding
- Work closely with the Campus Manager on the employability of the students
- Help the Campus Manager in finding guest speakers for the training course
- Represent the school in developers professionals communities and events (hackathon, meetups, etc.)

Skills and Qualifications

- Intimate knowledge of a dynamically typed language such as JavaScript / React / NodeJS
- Experience with agile methodologies (Scrum, Kanban..)
- Excitement about sharing knowledge and teaching approaches
- Participation in open source projects, meetups and other events related to the developer community
- Efficient use of tools and methods to adapt to the always changing technologies
- Fluent in English

Starting: March 2019

Interested? Send a CV & GitHub account to recruitment@wildcodeschool.com and write clearly in the subject line: Instructor React JS / Node JS Madrid
